

PRIVATE EVENTS – FEBRUARY 2021

Our team has prepared the highest standard of customized programs for you to have a unique experience of the heavens. Great hospitality and specialized scientists are willing to spacewalk with you and your friends and family this summer.

Our observatory will travel you to the Universe with our large, professional telescopes.

Red Planet Ahead		Look at the Far side of the Moon	
Proposed Program			
Time	Description	Time	Description
18:00	Welcoming.	18:00	Welcoming.
18:05	NASA Radio Jove Project (radiotelescope antenna). Listen to the sky.	18:05	NASA Radio Jove Project (radiotelescope antenna). Listen to the sky.

19:30	Night sky tour with laser pointer (bonus).	19:30	Night sky tour with laser pointer (bonus).
19:40	Observations of Jupiter, Saturn and best of the night deep sky objects.	19:40	Observations of the Moon, Jupiter, Saturn and best of the night deep sky objects.
<p>In autumn 2020 the new Mars opposition will happen. This will trigger this summer a lot of spaceships from Earth to start their journey to the Red Planet. Mars invites to solve its mysteries and Mankind answers the challenge.</p>		<p>The Moon constantly changes its appearance never showing its far side. Come to find what is there. A special exhibition with a Lunar Rock is waiting for you... and a Moonwalk with our large telescopes with great detailed view...</p>	

February 2021 gives you an excellent opportunity for observations from our observatory.

Join our spacewalk...
